AKHILJITH R

SOFTWARE ENGINEER

akhiljithpkd@gmail.com | linkedin.com/in/akhiljith-r-6435aa195 | github.com/Akhiljith1111 | akhiljith.netlify.app

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building scalable, production-grade frontend and backend (FE and BE) web applications using React, TypeScript, Next.js, Java, and Python. Skilled in delivering SaaS platforms and e-governance projects at state-government scale, designing Micro-frontend architectures with Module Federation, building real-time features with WebSockets, integrating REST APIs, and translating Figma designs into pixel-perfect interfaces.

TECHNICAL SKILLS

Programming Languages: Java, Python, TypeScript, JavaScript (ES6+), PHP, C/C++

Core Frameworks: React, Next.js, Angular

Architecture: Micro-frontends, Module Federation, SPA, Component Libraries

Real-time: WebSockets

Databases: PostgreSQL, MySQL, MongoDB

DevOps: DevOps

State Management: Redux, Context API, React Query

Styling: Tailwind CSS, Styled Components, CSS3/HTML5, Responsive Design

Integration: REST APIs, Axios

Tools & VCS: Vite, Git / GitHub, Figma, Jira

Practices: Agile/Scrum, Code Review, UI/UX Collaboration, Debugging

AI & Agents: LangChain, Agentic AI, Claude Code

PROFESSIONAL EXPERIENCE

Edstem Technologies Pvt Ltd **2022 - Present**

Software Engineer

- Delivered multiple client-facing SaaS and government web applications using React, TypeScript, and Next.js.
- Architected Micro-frontend solutions using Module Federation for large-scale government platforms.
- Implemented real-time features with WebSockets for live session monitoring and data updates.
- Built and maintained reusable React component libraries consumed across multiple projects.
- Integrated REST APIs and managed complex application state with Redux and React Query.
- Collaborated closely with designers to implement pixel-perfect Figma prototypes.

KEY PROJECTS

e-Niyamasabha *e-Governance / GovTech*

- Built frontend for a digital legislative management platform for a State Legislative Assembly, enabling fully paperless proceedings.
- Covered bill management, attendance tracking, and real-time session monitoring using WebSockets.
- Structured the platform with Micro-frontends and Module Federation for scalability across modules. Worked across Java and Python services and DevOps workflows alongside the React frontend.

Tech Stack: React, Java, Python, WebSockets, Module Federation, Micro-frontends, REST APIs, DevOps

RetroFlow *SaaS / Agile Tools*

- Built all frontend screens and reusable components from scratch for a Sprint Retrospective management SaaS platform.
- Implemented full state management and REST API integration.

Tech Stack: React, Redux, Styled Components, Tailwind CSS, Vite

Bloom Console *HR Management System*

- Developed frontend for an HR platform covering employee onboarding, project management, timesheets, leave management, and tech-desk modules.
- Integrated REST APIs across modules with reusable, styled components.

Tech Stack: React, Styled Components, REST APIs

TDMS *HR Tech / AI*

- Built the interface for an AI-powered talent data management platform that extracts and parses candidate data from resumes.
- Streamlined recruitment and data management workflows for HR teams. Worked with Java services and DevOps workflows alongside the React frontend.

Tech Stack: React, TypeScript, Java, REST APIs, DevOps

CERTIFICATIONS

- LangChain for LLM Application Development — DeepLearning.AI, Apr 2026
- Agentic AI — DeepLearning.AI, Apr 2026
- Agent + Skills with Anthropic — DeepLearning.AI, Apr 2026
- Claude Code in Action — Anthropic, Mar 2026

EDUCATION

BSc Computer Science **Kerala, India | 2016 - 2019**

Courses & Certifications: PHP Full Stack Development, Cyber Security
